What is **GRAFFOLUTION** ?

GRAFFOLUTION seeks to remedy problems associated with graffiti vandalism in public areas and transport contexts. It will innovate by widening understandings and seeking counter-intuitive responses for and from affected stakeholder groups and communities, including those who have utilised street art as part of city regeneration and place-making strategies.

The project targets a broad range of stakeholder communities including graffiti writers and all parties interested in graffiti, those who enjoy street art, as well those 'harmed' by graffiti vandalism.

Our online platform graffolution.eu provides an **Open Information Hub** and a **Collaborative Knowledge Base**. See on the next pages what graffolution offers for you.
